

Nancy Pataky is an alumnus of the University of Illinois with degrees in Ornamental Horticulture and Plant Pathology. Since 1976 she has been the director of the University of Illinois Plant Clinic. As extension specialist in plant pathology she specializes in education concerning diseases of ornamental plants. Nancy and the University of Illinois Plant Clinic are members of the National Plant Diagnostic Network (NPDN) which promotes rapid and accurate pathogen, insect, and weed identification. Invasive or exotic pathogens and pests or those on the national "Select Agent" list are of national concern, and Nancy has been involved in clinic upgrades to offer detection of some of these pathogens. To learn more about the Plant Clinic, visit the clinic web site at <http://plantclinic.cropsci.uiuc.edu/>.
